

DEGREASE AN

AUXILIARY DEGREASING
CHEMICAL COMPOSITION

Higher alcohol ethoxylates and anionic surfactants

CHARACTERISTICS

Properties :	light yellow dense liquid
Active substance :	60 – 65% about
pH in solution at 10 % :	5,5 – 6,5
Ionic Charge :	anionic
Compatibility :	anionic and not anionic
Biodegradability :	easily biodegradable Directive CEE/67/548

PROPERTIES

DEGREASE AN is a good degreasing for different uses and it has a good power for to obtain a wetting and dispersant effect. It causes a decisive lowering of the superficial tension favoring the maximum wetting degree of the fibers. This introduction is indispensable to obtain a good degreasing . **DEGREASE AN** can be used in all manufacture phases and for all kind of leathers .

KIND OF USE

It is used at 0,4% at 0,6% on sheepskins .
It is used from 1% to 1,5% on pigs skins .
It is used from 0,2% to 0,4% on calves .
