

# SYNCROM E

## CHEMICAL COMPOSITION

Phenolic-chrome syntan

### CHARACTERISTICS

Properties :	green powder
pH in solution at 10 % :	3,5 - 4

### PROPERTIES

SYNCROM E is a metallic-synthetic tanning agent. It is very suitable in the retanning of chromeleather to obtain full and compact leathers, preserving chrome character.

SYNCROM E has the following proprieties: low astringency, good dyeing performance, not hardening of leathers and high tanning power

### USING AND DOSAGE

As main retanning agent, before the neutralization, in quantities between 2 and 6% based on shaved weight, depending on the fullness and compacity required according to the wet-blue characteristics.
