

## TECHNICAL FORM

# SYNTAN CNR

COMPACT SYNTHETIC TANNIN  
CHEMICAL COMPOSITION

Combination of phenolic agent and natural polymer

## PROPERTIES

Appearance :	thin white powder
Concentration :	80 - 85 %
Ph :	4 - 5

## PROPERTIES

**SYNTAN CNR** is a synthetic tan with phenolic and natural polymer combination it can be used in the chrome tanning producing leather with a soft touch and round with firm grain, this makes it particularly suitable for the retanning of soft leathers such as shoe nappa, nappa clothing, etc.

It is recommended for use from 5% to 8%, depending on the skin type and the degree of softness desired. **SYNTAN CNR** is also particularly suitable for the tanning of leather for car upholstery and soft furnishings for living rooms. We recommend the use of 4-6%.

**SYNTAN CNR** can be used in retanning in combination with tanning agents and resins, producing excellent fullness and roundness, for both full-grain leathers, pure aniline for corrected grain, in this case it is recommended the use of 2-4%. **SYNTAN CNR** could be used as pre-tanning before the chrome tanning of rams, improving the fullness in the emptiest areas of the skin. For this application we recommend the use of 4% - 5% based on the weight pickled.
