

## LISOL LS

Wetting-emulsifier

### CHEMICAL COMPOSITION

Lauryl ether sulfate

### CHARACTERISTICS

Appearance :	Colorless semi-dense
pH in solution at 10 % :	5,5 – 6,5
Ionic charge :	anionic
Compatibility :	anionic and non-ionic
Active substance :	30-35 %

### PROPRIETIES

LISOL LS is a particularly suitable in wetting operations. It is used as wetting agent in the initial phase of retanning and as a dispensant in the subsequent dyeing operation.

LISOL LS is a surfactant for universal use, because it has excellent properties of degreasing, wetting agent and emulsifier.

### HOW TO USE

It is used from 0,3% to 0,6% in retanning and neutralization
