

LIKER TIS

FAT LIQUORS
CHEMICAL COMPOSITION
SULPHITED FISH OILS

CHARACTERISTICS

Properties :	REDDISH/ BROWN ONLY
Active substance :	66% about
pH in solution at 10 % :	6 - 7
Ionic Charge :	anionic
Compatibility :	anionic and not anionic
Biodegradability :	easily biodegradable Directive CEE/67/548

PROPERTIES AND APPLICATIONS

LIKER TIS is a sulphited fish oil with a clear red-brown appearance specially treated to give a minimum characteristic fish odour.

LIKER TIS is suitable to obtain leathers with a good mellowness and a full handle.

LIKER TIS is stable to chrome salts and can be used in the tan bath or the chrome re-tan bath.

LIKER TIS can be used in the production of all leathers, but it is particularly recommended in the production of chrome bovine upholstery, splits for industrial gloves and calf for "nappa" shoe leather.

SUGGESTED PERCENTAGES OF USE

In chrome tanning	0,5-1,0% on limed weight
In chrome retanning	1,0-2,0% on shaved weight
In fatliquoring for industrial gloves	10-12% on shaved weight
In fatliquoring for upholstery	4,0-5,0% in chrome re-tanning on leathers shaved Weight
